Technical Report Background Reading Links

<http://www.edshare.soton.ac.uk/8017/>

These links are to grey literature – part of your task is to learn how to evaluate the ‘strength’ of different pieces of information you find or encounter.

Very often grey literature will help you get ideas and orientate yourself when researching a problem, your skill is to go on and find authoritative evidence which you can use to build a case, whether that is for a technical report, essay, short paper or dissertation.

Although they help you understand the topic, some of the references here may be a bit out of date, or no longer technologically up to date, your task is to sift this evidence before you move on to find an read further information.

Evaluation Matrix

You may find it useful to use an evaluation matrix to compare the different resources you study
