In a significant change from the previous version, Turning Point 5 now provides a unified interface to all of the program's features. For example **Anywhere Polling** enables you to ask on-the-fly questions with any application, not just PowerPoint.

To use a PowerPoint presentation that includes question slides, click on **PowerPoint Polling**.
PowerPoint® Polling
Deliver interactive PowerPoint presentations using seamlessly created PowerPoint slides or imported TurningPoint question lists.
Anywhere Polling
Poll atop web pages, videos, documents or any application using a floating interactive toolbar.
Self-Paced Polling
Poll assessments, evaluations, and surveys that require participants to work at their own pace.

Cancel
using Turning Point
If your presentation was created using an older version of Turning Point, a dialog box warns you that the file will be automatically converted. If you save the file, it can no longer be opened by older versions. Make sure you upgrade your office PC or laptop to version 5 to avoid this being a problem.

created using Turning Point
The automatic conversion does not always work perfectly, especially for presentations created in Turning Point 2. We recommend that you convert your presentations on your office PC or laptop and check they work as expected before using them with students.

A question to test yo

What did you drink with you breakfast this morning?

1. Tea
2. Coffee
3. Fruit Juice
4. Water
5. Other
6. Nothing

Note the **showbar** at the top of the screen which shows information about the voting. The green area shows that polling is open and students can vote.

You should always include a test question so your students can check that their zapper is working.

Click the mouse to close polling – note the green area turns red.

A question to test yo

What did you drink with you breakfast this morning?

1. Tea
2. Coffee
3. Fruit Juice
4. Water
5. Other
6. Nothing

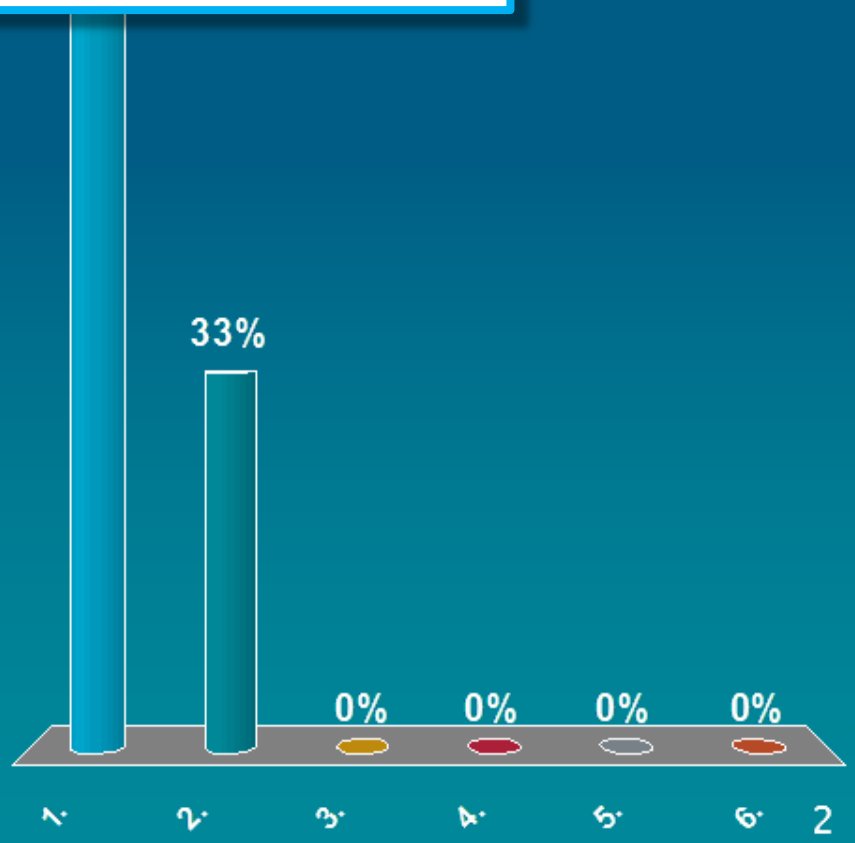
Responses 3

Polling Closed

Click again to display the results of the vote.

The #|% button on the showbar can be used to display the number of votes or the percentage for each answer.

1. Tea
2. Coffee
3. Fruit Juice
4. Water
5. Other
6. Nothing



When you close PowerPoint at the end of the session, a dialog asks if you want to save the changes. In most cases, you can safely choose **Don't Save**; only click **Save** if you want to save the voting charts as they appear.

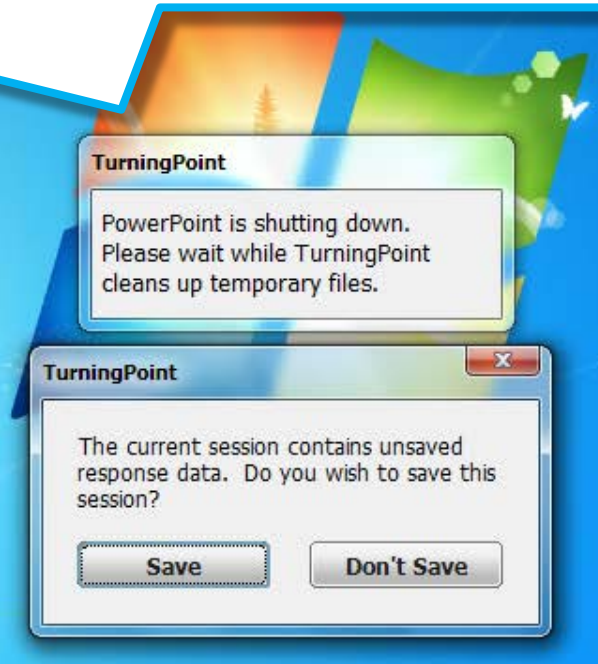
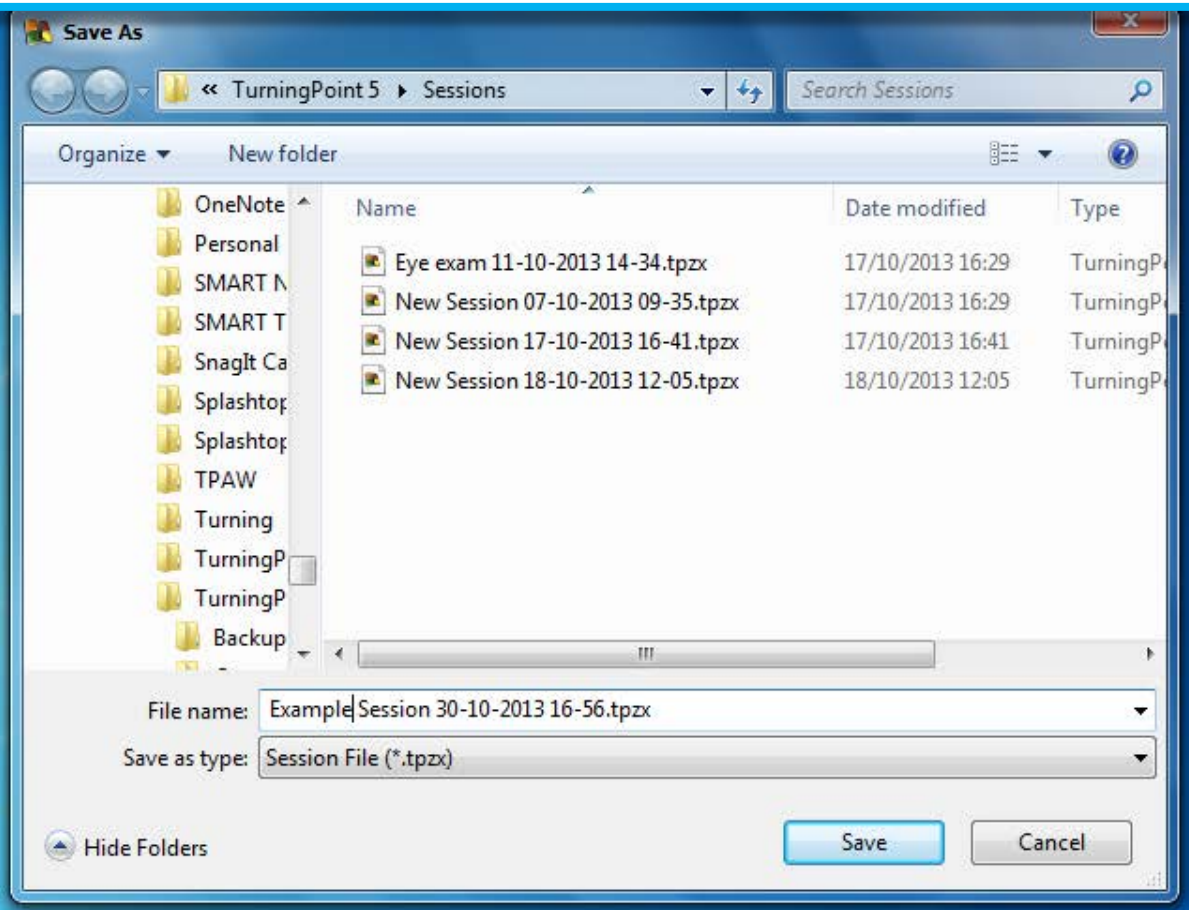
Convert to Demographic

A second dialog asks if you want to save the response data. In most cases, click **Save** so you can review and analyse the voting data.

If you click **Don't Save**, the voting data will be discarded and cannot be recovered later.



The voting data is saved by default to the **Turning Point** folder in **My Documents**. You should edit its name to make it easy to identify the session later.



You can save the data file to a USB drive instead if you prefer, but will need to import it into Turning Point before you can view or analyse it.

Don’t forget to remove the receiver at the end of the session and replace it in the zapper case. These receivers are expensive to lose!
